SUMMARY

I am an web developer - react js / PHP. I graduated from the University of Jordan in 2022 from the Department of Computer Information Systems. I have experience in creating attractive and easy- to-use websites using the best programming languages, and the ability to transform creative ideas and designs into a dynamic, responsive website that runs smoothly on different devices.

I follow technological developments in the field of website programming continuously to develop myself in a way that suits work requirements. I have the ability to absorb and adapt to continuous technical changes and apply them in innovative ways. I have the ability to cooperate and work teamwork.
